```
uexIndexBar
  字母索引列表功能
方法
  open 创建索引列表
  close 关闭索引列表
监听方法
  onTouchResult 点击 item 的监听方法
open
   创建索引列表
  uexIndexBar.open(x, y, width, height)
说明:
  创建索引列表
参数:
  x:(Number 类型)必选 x 坐标
  y:(Number 类型)必选 y 坐标
  width:(Number 类型)必选 宽
  height:(Number 类型)必选 高
平台支持:
  Android2.2+
  iOS4.3+
版本支持:
  3.0.0+
示例:
   见 close 方法示例
close
  关闭索引列表
  uexIndexBar.close()
说明:
  关闭索引列表
参数:
  无
平台支持:
  Android2.2+
  iOS4.3+
版本支持:
  3.0.0+
示例:
<html>
```

<meta http-equiv="Content-Type" content="text/html; charset=utf-8" />

```
<\!meta\;name="viewport"\;content="target-densitydpi=device-dpi,\;width=device-width,\;initial-scale=1.0,\;width=device-width,\;initial-scale=1.0,\;width=device-width,\;initial-scale=1.0,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width=device-width,\;width
user-scalable=no" />
                        k rel="stylesheet" type="text/css" href="../css/index.css">
                                   <title>索引列表</title>
                                    <script type="text/javascript">
                                               window.uexOnload = function(){
                                                           uexIndexBar.onTouchResult = function(opId, dataType, data){
                                                                       alert(data);
                                                          }
                                               }
                                    </script>
                                    </head>
            <body>
                        <div class="tit">索引列表</div>
                       <div class="conbor">
                                    <div class="consj">
                                               <span>1.显示 列表</span>
                                               <input class="btn" type="button" value="设置" onclick="uexIndexBar.open(100,100,200,400);">
                                               <span>2.关闭 列表</span>
                                               <input class="btn" type="button" value="关闭" onclick="uexIndexBar.close();">
                                    </div>
                       </div>
           </body>
</html>
onTouchResult
                点击 item 的监听方法
               uexIndexBar.onTouchResult(opId, dataType, data);
参数:
               opId:(Number 类型)必选 操作 ID, 此方法中不起作用,可忽略。
               dataType:(String 类型)必选数据类型,此方法中不起作用,可忽略。
               data:(String 类型)必选 索引值: a~z。
版本支持:
               3.0.0+
```
